SUSTAINABLE SUSTAINABILITY EFFORTS

We are dedicated to being sensible frontrunners on the environmental responsibility. If we provide timeless, lasting and functional quality designs, we know nature will prevail, as will UIMAGE.

GIVING BACK TO NATURE

We acknowledge that selling furniture and lighting can never be 100% sustainable, but we want to make an extra effort for the environment. We have made a collaboration with the NGOs One Tree Planted, so every time one of our designs made from wood is sold, we are planting a tree. Furthermore, every time you buy one of our polypropylene lampshades from our website, we are donating 5% of the product value to the NGO Plastic Change, supporting the World ocean clean-up and minimising plastic pollution.

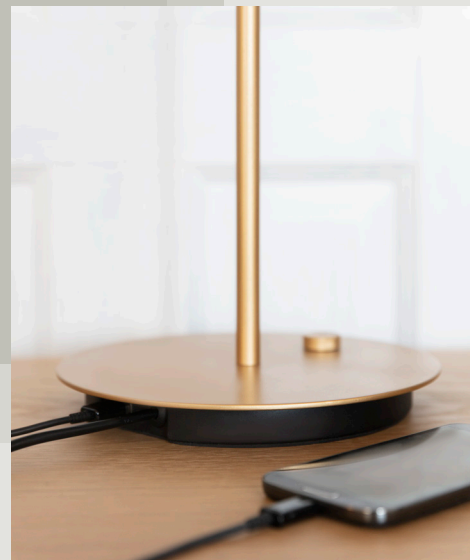

DURABLE QUALITY MATERIALS

We always choose quality materials to ensure prolonged lifecycles of our designs, so you can lead a sustainable lifestyle with care for the environment.

INTERCHANGEABLE ELEMENTS

As the times change, the designs can change accordingly. Two years have passed, and suddenly you want leather on your dining chairs instead of velour, then simply interchange the velour with leather in a few minutes. Same thing with our lounge chairs, cabinets, and other responsible designs. This means that you can add new life to the design and your interior without having to buy an entirely new furniture piece, saving the world resources.

MULTIFUNCTIONAL AND FLEXIBLE

Why have a table lamp or a side table and not include a USB or wireless charger as well? Why not make room for storage where the space is vacant anyway? UIMAGE not only answers these questions but make it happen. One of the key aspects of the furniture and lighting designs at UIMAGE is multiple functions and flexibility. Designing with more than one function in mind is a sustainable mindset as it reduces the number of products you need to buy to get a complete setting for your space.

COMPACT AND REUSABLE PACKAGING

To minimise the packaging waste, we have devised a new packaging concept repurposing the packaging to be used as beautiful storage boxes afterwards, without any branding. We are replacing all foam and plastic in our packaging with eco-friendly materials to minimise the plastic waste when purchasing an UIMAGE design. This is being implemented continuously from January 2020.

RECYCLING

All designs can be separated into key elements for recycling, and worn parts can be replaced, to extend the life of the designs.

Get detailed information about our sustainability concept at umage.com/sustainability

MEET THE DESIGNERS

At UIMAGE we have a unique and dedicated inhouse design team, making an extra effort to create designs that will make a difference to us all. They will never design a new chair for the sake of the design; they want to make sure that the design will add extra value, whether it's a new dimension of flexibility, functionality or sustainability.

JAZZ

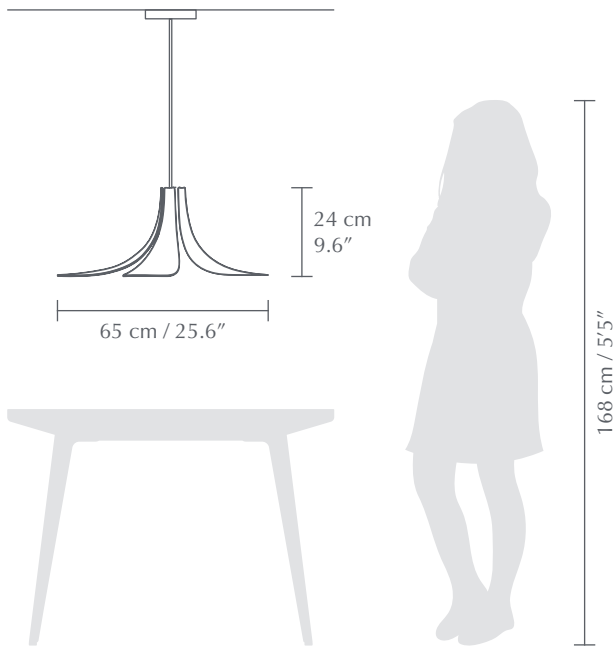

Designed by Magnus Nero & Ingemar Jönsson

ORGANIC SHADE OF THE NORDIC NATURE

Nothing makes you feel closer to the nature than the scent of wood, reminding us to slow down our lives and breathe, even if it's just for a moment. Made from oak the lampshade will bring the Nordic tones of nature into the interior. Crafted from an exclusive 3D veneer technology with an organic shape that will add warmth and vitality to the home.

The lampshade is inspired by the flowing lines found in a flourishing frangipani flower and a classical gramophone horn, hence the name. Jazz is designed by the design duo Magnus Nero and Ingemar Jönsson, with an international design profile working for Tom Dixon and Artek in the past. Use it as a pendant above the dining table, on Champagne floor, on the Willow family or simply placed directly on the floor creating a strong statement in the interior.

SINE

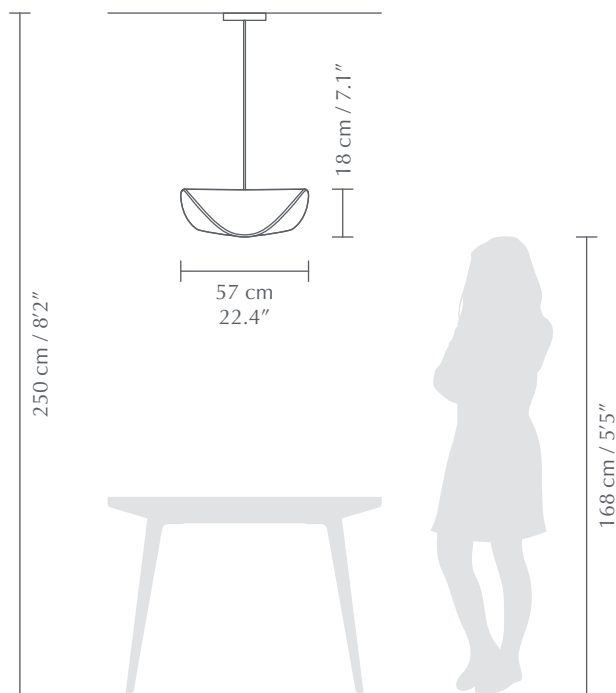

Designed by Miklós Leits

A PERPETUAL DANCE OF SYMMETRY AND ASYMMETRY

See, touch, feel, embrace. It's easy to let your mind wander and your eyes undulate to the rhythm of the Sine, a lampshade designed to lure and engage your senses. Its harmonious organic pattern contrasts symmetry and asymmetry, dark and light, grey and white, ups and downs, creating a remarkably different look depending on the angle from which it's viewed, and imprinting an apparent motion and a dynamic vibe to the lamp.

The tactile sense is as much delighted as the sight sense. The smooth layer of felt conveys a distinctive character and creates a cosy feel, evocative of the Nordic style and philosophy. Exquisite, intrinsically simple, yet with an attitude twist, Sine comes as a flat-packed lampshade that can be assembled without glue or any tools. Hidden zippers along the edges transform the 2D flat geometric shapes into a stunning 3D silhouette.

With an exclusive, yet playful design, and a completely glare-free glow, this lampshade can be placed in any spot, in any environment. All you have to do is to see, touch, feel, love.

TIME FLIES | CHAIR

Designed by Jonas Søndergaard

A CUSTOMISABLE CHAIR WITH A SUSTAINABLE EDGE

The upholstered chair is customisable and provides the flexibility of changing the upholstery yourself, so you can change the visual style without having to buy a new chair, securing a sustainable life of the design.

The chair secures comfort from all sitting positions making the time fly during dinner with friends – hence the name Time Flies™. Your ergonomic sitting position typically changes as the evening evolves: From sitting straight as you eat your dinner, to leaning your back more casually later in the evening, or turning your body as you go into a deep conversation with the person sitting next to you. The chair is designed with a top rail easing into armrests, securing a soft and steady back support from all angles, leaving space for your legs underneath the armrests as you turn your body during the evening.

You can choose from six carefully selected bespoke fabrics including velvet, leather and various woven textiles. Choose to go for one colour or mix and match the colours for the seat and backrest, making the style of the chair flexible and durable over time. The legs will be available in chrome, brass and black extending the flexibility even further.

THE READER | OTTOMAN

Designed by Tor Hadsund

INCREASE THE RELAXATION WITH THE OTTOMAN

The solid oak legs on the Ottoman are visually lifted from the base adding a light character to the design.

The shape of the cushions have been designed to slightly expose the Ottoman's shell, giving extra focus on the wooden details.

A palette of Scandinavian colours for the upholstery are carefully selected to endorse the natural wood of the oak. Other fabrics and leathers from Kvadrat and Sorensen leather are available on request.

FLOW | SHELF

Designed by Lasse Sortkjær

A FLOWING SHELF FOR THE WALL

Flow™, the new shelf that is flowing like waves on the wall – hence the name. Flow™ is the result of a designer's play with composition and materials, creating a strong visual attraction, while providing a steady functionality. A humble yet unconventional design.

"I wanted to challenge and confine the use of materials in the design to see how little is enough. My inspiration was trees growing in the forest. Trees are strong at the stem, but light and delicate at the twigs, just like Flow™" – Lasse Sortkjær, designer.

Flow™ is an artistic design piece and just by putting a few of your favorite objects on show, you will create a visual attraction to your living space. Flow™ comes in solid black stained ash, where the natural wooden surface shows, adding a warm appearance to the design.

STORIES | SHELVING

FLEXIBLE SHELVING TO DISPLAY YOUR STORIES

Stories is a flexible shelving unit where you can put the things you love the most on display and share your life stories. Stories™ consists of 4 shelves, where one has a hole with a brass plate for your small bits and bobs. The Shelving unit also comes with three wooden trays that has a venetian cane front making it easy to beautifully hide away your messy stuff.

Stories™ can be expanded to the size you need and personalized with the several shelving accessories, including a glass bowl, extra storage trays and a side table. Stories is made from oak and has a simple visual attraction with its four conical legs that creates an agile and dainty appearance. The shelving system comes with four brass feet that can be adjusted and levelled to the slanting floors often seen in the old apartments of Copenhagen.

Remove the brass plate and exchange it with the glass bowl accessory to create a beautiful indoor terrarium planter or even hold a goldfish. Add the round corner table accessory to the side of the shelving system to display a plant or other things that need that extra important spot in your space. DUNES | Leather from Sorensen Leather

The DUNES collection has received the Nordic Swan Ecolabel. A highly-respected certification verifying that it meets their rigorous requirements regarding the environment, use of energy and resources. A special process involving sanding, buffing and applying a special type of leather oil to the surface gives it that almost velvety

touch. At the same time, DUNES boasts a matt look that's raw with a touch of understated elegance. Part of DUNES' extra appeal are the subtle, natural markings which bring a unique personality to each hide. The five colours we feature will also vary from hide to hide and with each individual hide. Watch for a delicious patina

that will appear over time as a result of the leather's exposure to daylight, interior lighting and usage. In fact, the more you use DUNES, the more the leather becomes shinier and smoother.

Harald 3 | Upholstery from Kvadrat

A closely-woven, very short-pile velour, Harald brings the fresh, soft texture of cotton to a directionless velvety textile. The intense colour offered by this matte velour places the focus strongly onto the silhouette of the up-

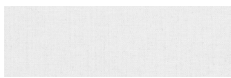

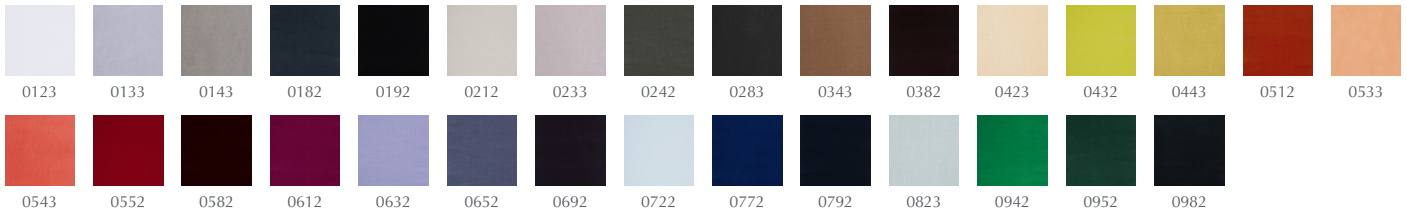

holstered object, emphasising its shape and contours. Originally designed by Fanny Aronsen, Harald comes in a new colour palette conceived by Raf Simons offering a particularly large selection of vivid keynote tones,

including primrose yellow, burnt orange, raspberry, lavender, aubergine and dark mint green, alongside more natural tones. Harald is a durable fabric suitable for use as curtains as well as in upholstery.

Maple | Upholstery from Kvadrat

Aero-finished and therefore extremely soft to the touch, Pine and Maple are made with three tone-in-tone coloured yarns. The viscose used in their construction gives them a distinctive shimmer, which deepens according

to the light and the perspective of the viewer. Pine is flat-woven and has a subtle striated look. Maple is woven with a chenille yarn and has a soft pile that reveals the structure of the weave. Foreign fibres and

small clusters of colour may appear on the textiles' surface adding to their slightly irregular, casual expression.

Re-wool | Upholstery from Kvadrat

Crafted using 45% recycled wool, Re-wool is a rich upholstery textile with a sustainable profile. The textile is partly made by reusing scraps from Kvadrat's yarn spinners in the UK. It is designed by Margrethe Odgaard. 'The

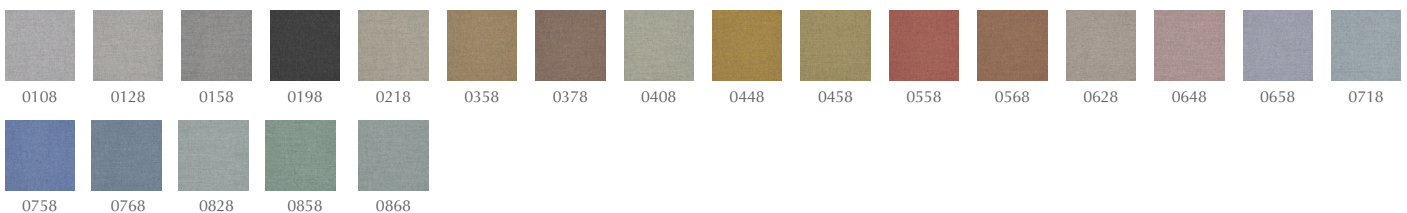

idea was to create a both honest and environmentally friendly – textile with a poetic feel by recycling leftover material from Kvadrat's own production', explains Margrethe Odgaard. Reminiscent of colourful stitchings on a

darker background, Re-wool features exceptional depth of colour, creating a dynamic play on the textile's surface when applied to furniture.

plastic change

We have entered the fight against plastic pollution and helping to minimize plastic waste in a collaboration the NGO Plastic Change.

Every time you buy a wooden furniture piece, we are planting a tree - making an effort for the environment.

At UMAGE we make an effort for the environment, so this catalogue is printed on FSC®-certified paper to make sure the paper originates from responsibly managed forests.
